## Introducing the WHEELER-REX Model 4992 Tubing Cutter – The New Plumber’s Favorite Tool

WHEELER-REX is proud to introduce our new lineup of snippers and tubing cutters to the WHEELER-REX family of products! This product line offers improvements and updates to our line of hand tools, with the same quality you’ve come to associate with WHEELER-REX.

Our new Model 4992 Tubing Cutter is the flagship of the line. The 4992 cuts pipe diameters ranging from ¼” to 2-3/8” OD, making tight cuts quick and simple. With minimal clearance required –plumbing, air conditioning, and commercial boiler work is easier than ever. With over 80,000 older units sold, the new Model 4992 is sure to be a hit.

The complete lineup includes over 20 revised and redesigned products, and WHEELER-REX is offering special distributor terms for this promotion. We’re offering two new distributor promotion packages featuring this new lineup as well as the opportunity to create your own package of best-selling items for your location. This deal features a 90-day full return policy on all items.

This promotion is characterized by a newly designed wall display. This eye-catching unit proves an effective sales aid, configurable to house any tool in the lineup.

### Close Quarters Tubing Cutter 4992

Contractors and other professionals know that when it comes to some jobs, tight working conditions are inevitable. Whether it’s plumbing, air conditioning, or commercial boilers, WHEELER-REX’s new Close Quarters Tubing Cutter can make things a lot easier.

**4-Roller Design**

## Makes Tight Cuts Easy

Make cuts with minimal clearance required with the new Model 4992. With the Model 4992, you can cut where others just can't. If you're working underneath vanities, close to walls, wastes and overflows, or in other confined spaces you need a Model 4992.

## Cuts 1/4" - 2-3/8" OD Pipe

Tackle a wide range of piping with the Model 4992, from 1/4" up to 2-3/8" outer diameter for non-ferrous tubing and plastic pipe using the included wheel cutter for plastic. It also cuts thin wall materials like traps and tailpieces with no distortion. The Close Quarters Tubing Cutter prevents sawing, so you avoid loose joints.

## Toolless Fast Wheel Change

Keep up the pace at work, with the Model 4992. Our new design allows for a quick and easy transition between cutting wheels, with only a simple push-pin: no special tools required!
